

# Accelerate SaMD development and *decrease* cost & time to market

HTD SaMD Chassis is a starter pack that streamlines the development process and addresses key SaMD challenges.

Robust, compliant, and customisable foundation to jumpstart your SaMD projects and focus on what really differentiates you.

Built on our extensive experience, expertise and in-depth understanding of the challenges of SaMD development.

It's designed to eliminate common development headaches and accelerate the journey from idea to submission-ready product.

Choose a faster, smoother, and more efficient path to creating high-quality, compliant, and impactful SaMD products.

## Pre-Built Compliance

We built Chassis in compliance with ISO 13485, IEC 62304, ISO 14971, saving you considerable time and resources.

## Advanced Security Protocols

HTD has ISO 27001 certification, ensuring our Chassis safeguards sensitive health data, offering trust and peace of mind.

## Modular Architecture Design

With its modular architecture, the Chassis lets you select features per your needs, boosting development efficiency and cost-effectiveness.

## AI-Ready

Our AI-ready Chassis enables you to effortlessly integrate AI capabilities into your SaMD, without the hassle and cost of starting from scratch.

## Scalable Infrastructure

Designed to scale with your needs, our Chassis ensures your SaMD remains future-proof and provides an excellent return on investment.

## Rigorous Design Verification

Our Chassis has undergone extensive and rigorous testing to ensure optimal performance, reliability, and quality, minimizing the risk for your SaMD projects.
